

Sculptura

Precious beauty formulae

Sculptura Peel is a **bi-phase superficial treatment**, for the obtainment of specific targets.

It helps to cure concrete blemishes, improves the skin's texture and makes it look bright.

The exfoliation obtained with **Sculptura Peel** products accelerates the cellular turnover, removes damaged cells and activates an increased synthesis of collagen and elastin. In addition to the professional treatment, it is recommended to use the **Sweet Skin System home care** products in order to maintain results.

Thanks to the **αβ Complex**, - a special compound, - and to the ad hoc created selections of active principles, the **Sculptura Peel** is easy to use and offers control and safety.

PHASE 1. Based on **αβ Complex**, a mix of glycolic, mandelic, lactic and salicylic acid that have diverse concentrations and are released slowly. Important for an efficient exfoliation.

PHASE 2. Integrates the therapeutic action of Phase 1. It stimulates the derma by moving specific active principles necessary to treat given blemishes. Because of its more alkaline pH level, the peeling can be left on longer.

Bi-phase treatment with 5 specific formulations

Sculptura Peel line:

- SENSITIVE SKINS
- NORMAL SKINS
- STRONG
- ACNE
- DYSCHROMIA

There are 5 formulations. In addition to the professional line, in order to maintain results, it is recommended to use also the **Sweet Skin System home care products**.

● SCULPTURA PEEL SENSITIVE SKINS

Bi-phase peeling for thin and particularly sensitive skins.

PHASE 1 αβ Complex (peeling power similar to 25% Glycolic Acid)

PHASE 2 (Blueberry, Hamamelis Virginiana, Ginkgo Biloba, Ruscus, Calendula Officinalis, etc.)

● SCULPTURA PEEL NORMAL SKINS

Bi-phase peeling for the refreshing of slightly aged skins.

PHASE 1 αβ Complex (peeling power similar to 50% Glycolic Acid)

PHASE 2 (Ginkgo Biloba, Bisabolol, Hyaluronic Acid, Green Tea, etc.)

● SCULPTURA PEEL STRONG

Bi-phase peeling for advanced aging aimed at reducing superficial wrinkles.

PHASE 1 αβ Complex (peeling power similar to 70% Glycolic Acid)

PHASE 2 (Ginkgo Biloba, Bisabolol, Hyaluronic Acid, Green Tea, etc.)

● SCULPTURA PEEL ACNE

Delicate and efficient bi-phase peeling, a valuable adjuvant in treatments of acne prone skins.

PHASE 1 αβ Complex (peeling power similar to 40% Glycolic Acid)

PHASE 2 (Salvia, Greater Burdock, Nordihydroguaiaretic Acid etc.)

● SCULPTURA PEEL DYSCHROMIA

Bi-phase peeling indicated for various skin pigmentations. This peeling reduces superficial blemishes and is very useful in getting the skin ready for professional and/or home care treatments, because it moves substances necessary to prevent and combat dyschromia.

PHASE 1 αβ Complex (peeling power similar to 50% Glycolic Acid)

PHASE 2 (Aspergillus Ferment, Glycyrrhiza Glabra, Arbutin, etc.)

SCULPTURA PROFESSIONAL PROTOCOL

- >> [1] Use cleansing milk to remove eventual impurities and make-up from the face. Use the **Cleansing Gel AHA 5%** to rebalance the skin pH and then rinse with water
- >> [2] Apply the gel contained in **PHASE (1)** over the whole face using a brush and leave on for 2-3 minutes.
- >> [3] Without removing **PHASE (1)** apply the gel contained in **PHASE (2)** and leave on for 2-3 minutes..
- >> [4] Remove the gel with the help of a wet cotton wool or gauze.
- >> [5] Apply a homogeneous thick layer of **After Peeling Mask** specific for the type of skin treated and leave on for 5-10 minutes.
- >> [6] Remove the **Mask** with the help of a cotton pad or gauze soaked in water, and then apply the Soothing Cream.

Important: if during Phase 1 or 2 there is immediate reddening and/or intense burning sensation, remove the peeling with water and the neutralizer (Post Peel). This rare reaction might be due to hypersensitivity to some components of the formulations.

HOME CARE PROTOCOL (Sweet Skin System)

		HOME CARE PREPARATION (15-20 days before the treatment)	PHASE SCHIELD (for one week after the treatment)	KEEPING
SCULPTURA PEEL SENSITIVE SKINS	EVENING	Sensitive Skin Cream AHA 8%	Soothing Cream	Sensitive Skin Cream AHA 8%
